OTHER STRONG POINTS OF THE PUY-DE-DÔME

The department relies on two forward-looking fields: bio-sourced material (SIGMA) and sustainable civil engineering (Polytech). BIM training courses are also available to model tomorrow's constructions.

The Metal Additive Manufacturing sector is dynamic and emerging in the department. It includes many players: manufacturers (AddUp), machine suppliers (3D Systems, Intexy), or even training and research centres such as Sigma and its "Additive Manufacturing Chair".

The competitive hubs and clusters provide structure for a cooperation between businesses and public research in various sectors, especially:

- Polymeris and IMC in the rubber, plastics and composites sector,
- CIMES and the Centre de promotion des métiers de l'industrie HALL 32 (Industry promotion centre) which stimulate innovation and exchanges, especially around the industry of the future,
- Vegepolys Valley, Innov'Alliance, ADIC, Cluster Bio for the agri-food industry, Fibois and Xylofuture in the wood industry,
- I-Care, Innovatherm, GIMRA, Biopôle Clermont-Limagne and Lyonbiopole for healthcare.

DID YOU KNOW?

The Michelin International Research Centre in Ladoux, is internationally renowned and set up in the Puy-de-Dôme.

With innovative companies (Carbios, Michelin, etc.) Clermont-Ferrand and its biopole are positioned among the leaders in green plastics and materials of tomorrow.

The environmental issue is also taken into account from the point of view of sustainable mobility (Future Cataroux park, Campus Innov Durable to name but a few).

FOCUS

LOGISTICS

With its strategic position, the Puy-de-Dôme is becoming an important player in French and European logistics. At the crossroads of the A75 (North-South) and the A89 (East-West) motorways connecting Europe to the Atlantic Ocean and the Mediterranean Sea.

A developed activity which accounts for almost 10% of the jobs in the department. (INSEE - DADS)
